

New Fishes of Japan: Part 3

Parts 1 and 2 of *New Fishes of Japan* were published by the National Museum of Nature and Science in March of 2007 and 2008, respectively. These two publications included 26 papers describing 43 new fish species/subspecies belonging to 24 genera and 16 families. Although many new fishes were described in Parts 1 and 2, there are still more new fishes in Japanese waters remaining to be described (Matsuura and Senou, 2004). Considering this situation, the museum decided to continue publishing a series of new fish papers in the Supplement to the Series Zoology of the Bulletin. Part 3 of *New Fishes of Japan* comprises 10 papers by 14 authors, including 15 new species belonging to 10 genera (3 new genera) and 6 families. A list of new fishes published in Parts 1, 2 and 3 is shown in Table 1 (see on the reverse). As in Parts 1 and 2, the papers of this volume were submitted primarily by Japanese ichthyologists, but also include contributions from ichthyologists in Taiwan and the United States.

We express our sincere thanks to reviewers of the papers in this volume. The reviewers of the papers were: Kent E. Carpenter Daniel M. Cohen, Hiromitsu Endo, Ronald Fricke, David W. Greenfield, Kiyotaka Hatooka, Douglass F. Hoese, Tomio Iwamoto, Akihisa Iwata, G. David Johnson, Jeffery W. Johnson, Helen K. Larson, Randall D. Mooi, Hiroyuki Motomura, Edward O. Murdy, Hiroshi Senou, David G Smith, Toshiyuki Suzuki, and Richard Winterbottom.

Matsuura, K. and H. Senou. 2004. How many fish species in Japan — known vs. unknown —. *Biological Science*, 55(2): 79–86. (In Japanese.)

Table 1. New fishes published in Parts 1, 2 and 3. Genera in bold letters were described as new.

Part	Number of New Species/Subspecies	Genus	Family
3	1 species	<i>Glossanodon</i>	Argentinidae
2, 3	2 species	<i>Cocotropus</i>	Aploactinidae
2	1 species	<i>Guentherus</i>	Ateleopodidae
2	1 species	<i>Engyprosopon</i>	Bothidae
2	1 species	<i>Astrocottus</i>	Cottidae
2	1 species	<i>Cynoglossus</i>	Cynoglossidae
1	4 subspecies	<i>Acheilognathus</i>	Cyprinidae
1	1 species	<i>Amblyeleotris</i>	Gobiidae
3	4 species	<i>Ancistrogobius</i>	Gobiidae
1	2 species	<i>Asterropteryx</i>	Gobiidae
1	2 species	<i>Grallenia</i>	Gobiidae
3	1 species	<i>Gobiopsis</i>	Gobiidae
3	1 species	<i>Hetereleotris</i>	Gobiidae
1	3 species	<i>Obliquogobius</i>	Gobiidae
3	3 species	<i>Parioglossus</i>	Gobiidae
3	1 species	<i>Phoxacromion</i>	Gobiidae
2	1 species	<i>Platygobiops</i>	Gobiidae
1	1 species	<i>Priolepis</i>	Gobiidae
1	6 species	<i>Trimma</i>	Gobiidae
1	3 species	<i>Vanderholstia</i>	Gobiidae
1	1 species	<i>Careproctus</i>	Liparidae
3	1 species	<i>Malthopsis</i>	Ogocephalidae
1, 2	6 species	<i>Parapercis</i>	Pinguipedidae
3	1 species	<i>Inegocia</i>	Platycephalidae
2	1 species	<i>Plotosus</i>	Plotosidae
1	1 species	<i>Chromis</i>	Pomacentridae
2	1 species	<i>Acanthopagrus</i>	Sparidae
1	1 species	<i>Dentex</i>	Sparidae
1	2 species	<i>Zoarchias</i>	Stichaeidae
3	1 species	<i>Myopsaron</i>	Trichonotidae
1	1 species	<i>Lycenchelys</i>	Zoarcidae
2	1 species	<i>Bilabria</i>	Zoarcidae
2	1 species	<i>Davidijordania</i>	Zoarcidae
